RE: No Further Action Letter
Pitt County School Bus Garage Site
Greenville, Pitt County NONCD0002901

Dear Mr. Price:

On March 13, 2013, I completed my review of the February 15, 2013 No Further Action Request and its attached January 28, 2013 Mineral Springs Environmental, P.C. Groundwater Assessment Report (Report) for the subject site. Based on the Report, the results from the groundwater sampling events from December 4, 2012 and January 7, 2013, show no detections of vinyl chloride and only minor detections of other volatiles which were all found to be below the 15A NCAC 2L Groundwater standards.

Since the groundwater remediation goals of the Inactive Hazardous Site Branch have been met and the attached Certification of Attainment of Cleanup goals indicate all other cleanup goals have been addressed, no further remediation will be required at the site unless the Department later determines, based on new information or information not previously provided to the Department, that the site has not been remediated to unrestricted use standards or that the Department was provided with false or incomplete information.

If you have any questions, I can be reached at the (919) 707-8355.

Sincerely,

Keith Snaveley, Hydrogeologist
Inactive Hazardous Sites Branch
Superfund Section
